

# 2024 St. Lawrence - Eastern Lake Ontario MaMA Action map

## Actions to do in 2024

Establishing MaMA Mortality Monitoring plots  MaMA Plot is helpful in any area

 Areas with no EAB detection; do EAB/Ash Surveys; if ash mortality from EAB found do RAMA assessment

 Do RAMA assessment (EAB detected 1-3 years ago; ash mortality is predicted 1-50%)

 Do RAMA assessment; if mortality  $\geq 95\%$ , search for Lingering Ash (EAB detected 4-7 years ago; ash mortality is predicted  $>50-100\%$ )

 Search for Lingering ash (at least 8 years since EAB detection; ash mortality is predicted 100%)
